

# Freedom Company

The safety control of your company in your hands!

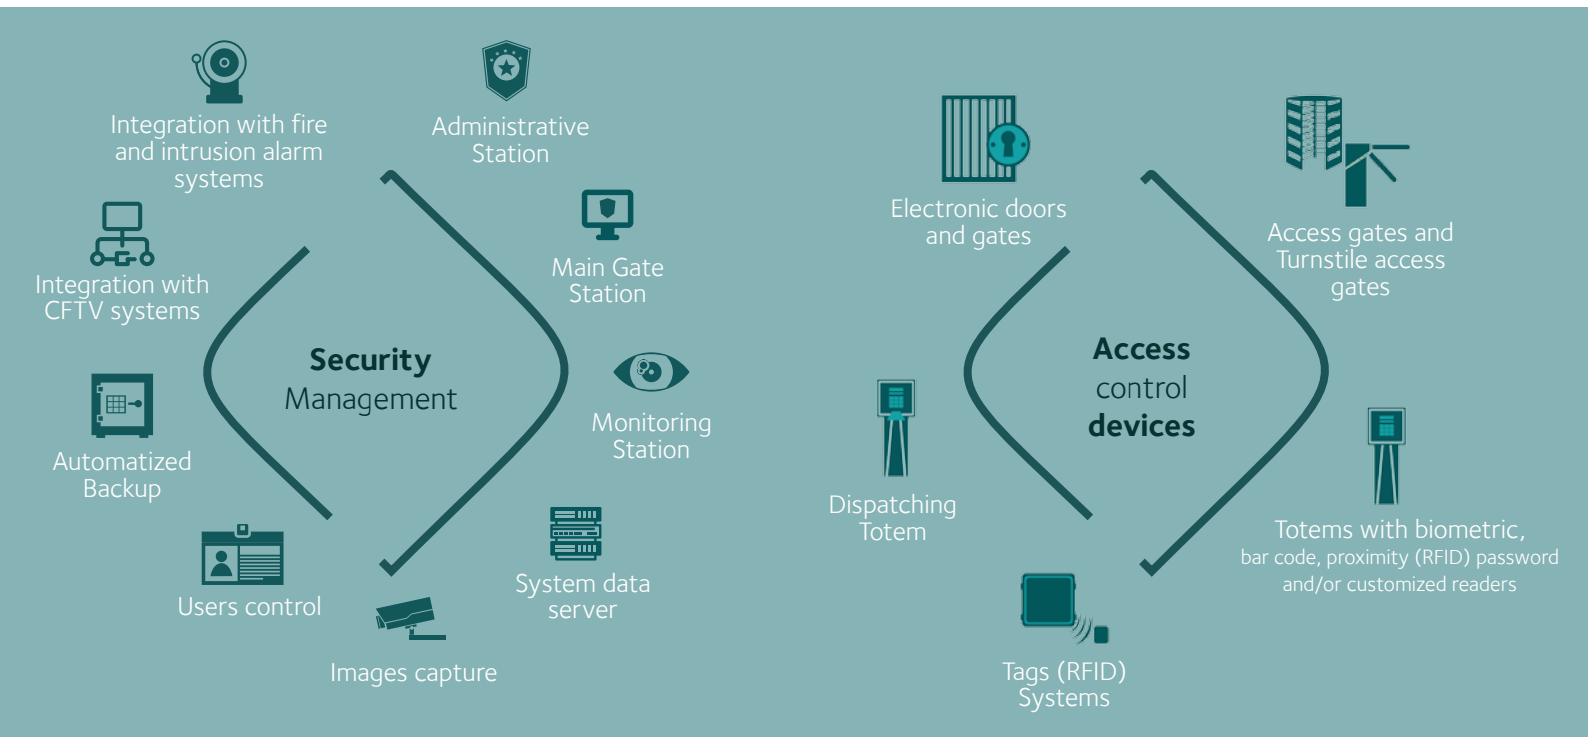

# Freedom Company

For more than 40 years, Proansi Technology develops and implements safety Softwares and devices with expertise for residential and commercial condominiums, companies, industries, logistics yards, bakeries, restaurants and convenience stores.

With highly trained professionals, Proansi Technology develops implements and monitors, in real time, the status of solutions installed in all its customers. Guaranteeing fast service and ensuring satisfaction.

In order to offer entrepreneurs total management of the security system, Proansi Technology developed the Freedom Company: solutions for access control and security for commercial condominiums, companies, industries and logistic yards. In addition to providing practicality to users, its technology also increases business safety and management control.

This security platform differential is the biometric access approved by the FBI. Moreover, Freedom Company interface is highly didactic, allowing for fast and easy access and resources application, and also enables customization to take care of specific features of each customer.

## Practical interface

The Proansi Technology team thought of every Freedom Company detail to give to greater comfort to users. Allowing for the access control and all possible interventions to be fast and efficient.
