

Freedom Security

Freedom, safety and
comfort for residents!

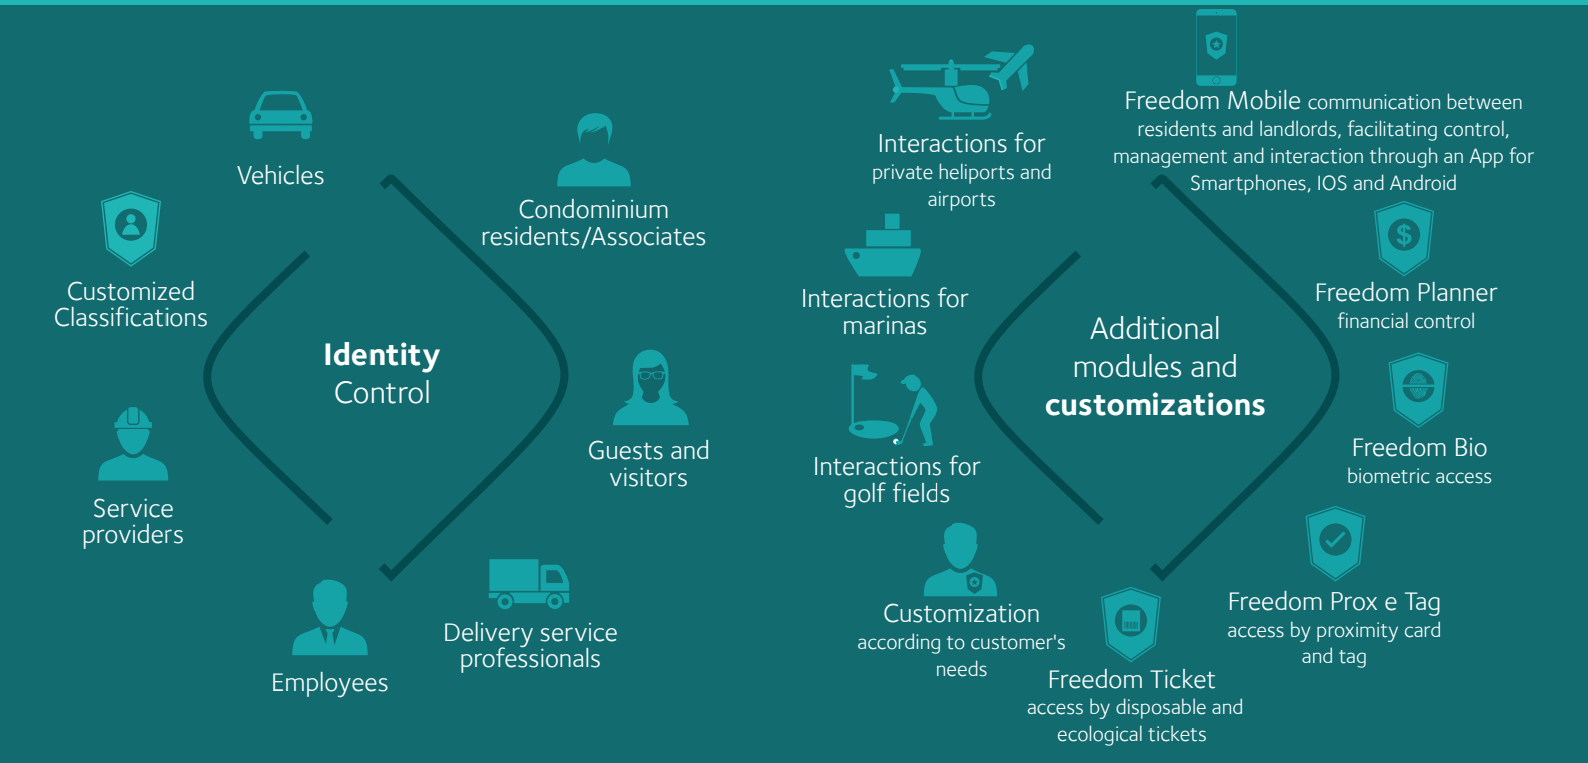

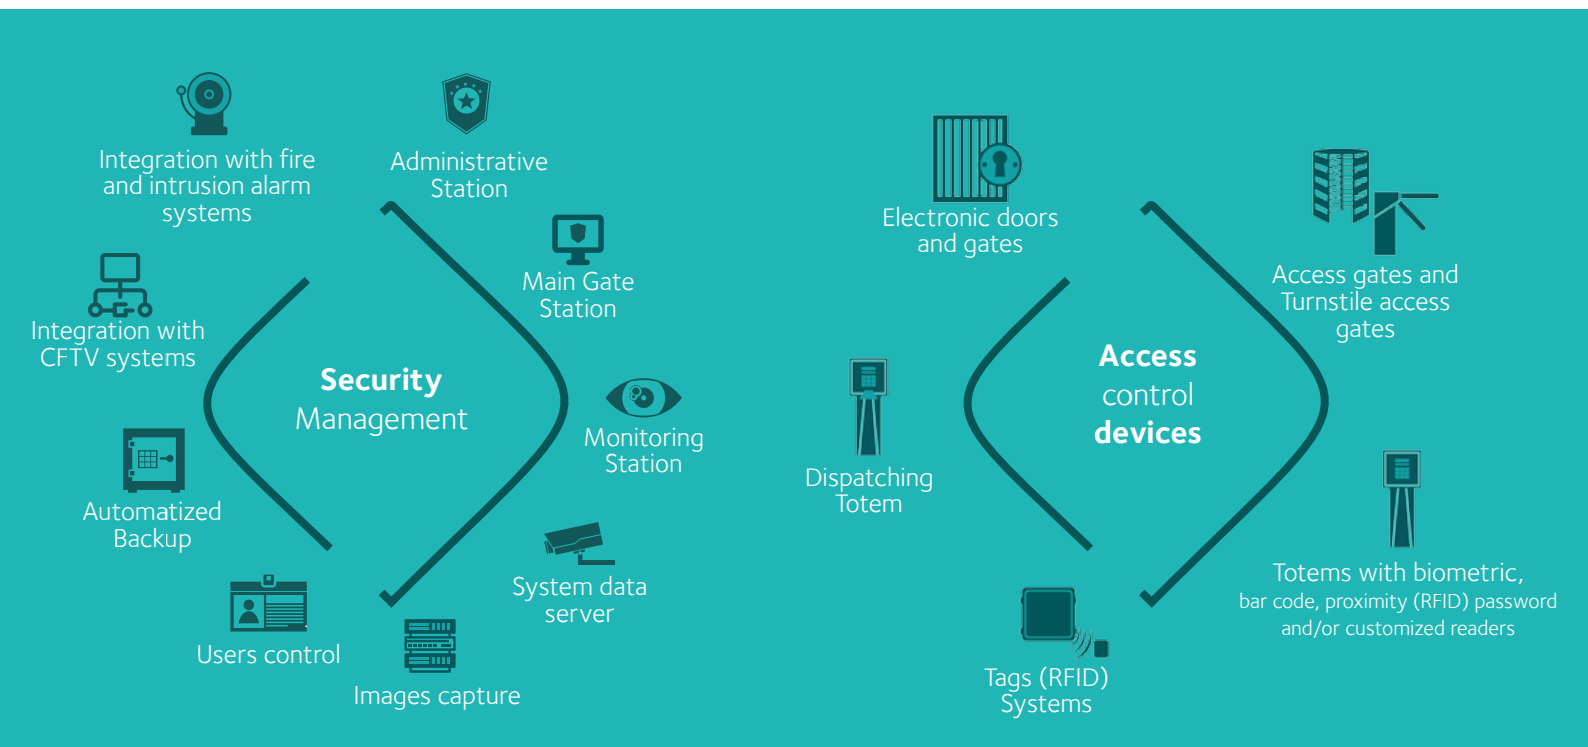

Freedom Security

For more than 40 years, Proansi Technology develops and implements safety Softwares and devices with expertise for residential and commercial condominiums, companies, industries, logistics yards, bakeries, restaurants and convenience stores.

With highly trained professionals, Proansi Technology develops, implements and monitors, in real time, the status of solutions used by its customers. Guaranteeing fast service and ensuring satisfaction.

With advanced technology and biometric access approved by the FBI, Freedom Security is the sure solution for access control and safety in horizontal and vertical residential condominiums. In addition to providing convenience to users, its technology increases safety and control.

This security service platform is highly didactic, allowing for access and system resources employment in a fast and easy way. Moreover, Freedom Security interface enables customization to serve all specific features of each customer.

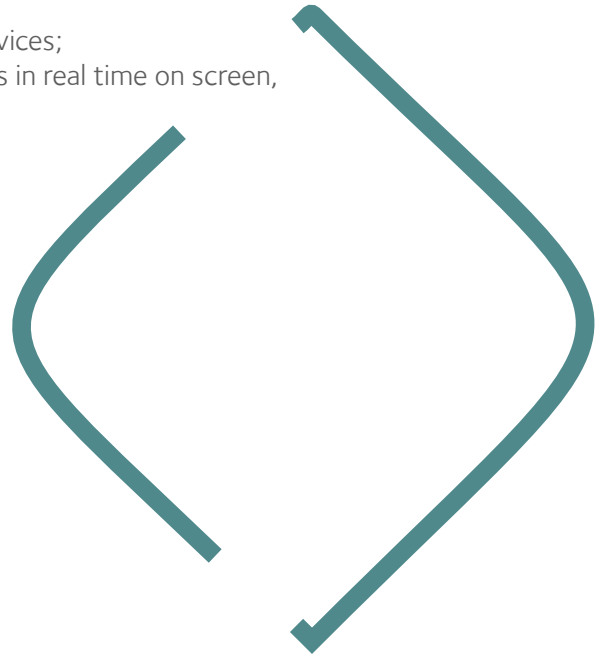

Practical interface

Proansi Technology team has thought about each detail of Freedom Security to offer greater comfort and safety to the residents, managers and users of the system. The technology of Freedom Security allows for the access control and all possible interventions to be fast and efficient.
